Course Syllabus

Idaho Home Driver Ed — 30-Hour Classroom Course

This course is the 30-hour classroom instruction component of Idaho's driver education requirement. It is delivered online through the Agilix Dawn learning management system and is organized into 9 sections and 34 modules.

Idaho Home Driver Ed is an Idaho State Department of Education–approved driver education course.

Course Policies

Mastery by points. Every quiz, Check Your Understanding, and practice activity earns points. Students complete the course by earning at least 95% of all available points, so every activity counts. There is no separate passing score on any single quiz.

Quizzes. Students review the lessons before each quiz, and the points they earn add to their course total. Notes are not allowed during a quiz.

Review. If a quiz shows gaps, the student goes back and reviews the lesson their parent identifies before moving on.

Progression. Modules are completed in order. Students cannot skip ahead until the current module's quiz is complete.

Beyond the Classroom Hours

Idaho also requires 6 hours of behind-the-wheel training and 6 hours of observation. After driver education is complete, students enter a Supervised Instruction Period of at least 6 months, logging 50 hours of supervised practice including at least 10 hours at night.

Scope & Sequence

Section	Modules	Hours
1. Course Overview & Parent Orientation	1.1 Understanding Course Requirements 1.2 Understanding the Nature of Driving	1.5
2. Vehicle Awareness	2.1 Identifying Gauges & Warning Symbols 2.2 Operating Vehicle Control Devices 2.3 Understanding ADAS Safety Features 2.4 Preparing to Drive 2.5 Protecting Occupants	3.5
3. Traffic Control	3.1 Traffic Control Devices & Laws 3.2 Right of Way Rules	3.0

Section	Modules	Hours
4. Vehicle Control	4.1 Vehicle Positioning 4.2 Performing Basic Control 4.3 Lane Changes & Passing 4.4 Performing Turnabouts 4.5 Parking Maneuvers	5.0
5. Controlling the Area Around Your Vehicle	5.1 Using Vision for Vehicle Control 5.2 Time & Space Management Systems & Strategies 5.3 Intersections	3.5
6. The Physics of Driving	6.1 Effects of Gravity & Energy of Motion 6.2 Negotiating Hills & Curves	4.0
7. Driving Environments	7.1 Rural Driving 7.2 Urban Driving 7.3 Driving on Limited Access Highways 7.4 Night & Reduced Visibility 7.5 Adverse Weather Conditions	4.5
8. Cooperating With Other Roadway Users	8.1 Driving Within the Highway Transportation System 8.2 Responding to Emergencies 8.3 Responsibilities After a Crash	2.5
9. Being a Responsible Driver	9.1 Effects of Emotions on Driving 9.2 Disabilities & Driving 9.3 Alcohol & Drugs 9.4 Alcohol/Drug Involved Crashes & Idaho Law 9.5 Drowsy Driving 9.6 Aggressive Driving 9.7 Distracted Driving	2.5
Total	34 modules	**30.0**
